PROFESSIONAL SUMMARY

Recent B.Tech graduate in Artificial Intelligence and Data Science (CGPA 8.0/10) with hands-on experience building full-stack, AI-integrated applications using Java, Spring Boot, React.js, MySQL, and cloud services on Microsoft Azure. Skilled in REST API development, NLP/ML model integration, and third-party API orchestration (OpenAI, Clerk, Supabase). Seeking an entry-level Java Full Stack Developer role to deliver scalable, production-ready solutions.

TECHNICAL SKILLS

- Programming Languages: Java, Python, SQL
- Backend: Spring Boot, REST APIs, Hibernate/JPA (academic), Microservices concepts, System Design (fundamentals)
- Frontend: HTML, CSS, JavaScript, React.js
- Cloud & DevOps: Microsoft Azure, Git, GitHub
- AI & Data: Machine Learning, NLP, OpenAI API, scikit-learn
- Database: MySQL, Supabase (PostgreSQL)
- Other Tools: Clerk (Auth), PostHog (Analytics), Oxylabs (Data Collection), Postman

EXPERIENCE

Android Application Development Intern

June 2023 - July 2023

NSIC – Technical Service Centre

- Completed a hands-on internship focused on Android application development, gaining practical exposure to mobile app design, development workflows, and debugging.
- Applied core Java and Android development concepts to build and test functional app components under mentor guidance.

PROJECTS

AI-Powered HR Recruitment System

Java, Spring Boot, React.js, Python, NLP, Machine Learning, MySQL

- Built an AI-powered recruitment platform automating resume screening, candidate data extraction, job matching, and applicant ranking across 4 core modules (upload, parse, match, rank).
- Designed and implemented 10+ REST API endpoints connecting the React.js frontend, Spring Boot backend, and Python-based AI/NLP services.
- Applied NLP and Machine Learning techniques to parse resumes and score candidate-job fit, cutting manual resume screening effort by an estimated 60-70%.
- Structured the MySQL schema to support multi-recruiter workflows and role-based candidate pipelines.

AI-Powered News Blog

React.js, OpenAI API, Oxylabs, Clerk, Supabase, PostHog

- Built a full-stack news aggregation platform using Oxylabs for automated scraping across multiple news sources and the OpenAI API for AI-generated article summarization.
- Implemented secure authentication and session management using Clerk, and modeled application data in Supabase (PostgreSQL).
- Integrated PostHog analytics to track user engagement and run feature experiments, informing 3+ UX iterations.
- Reduced average article read time by generating concise AI summaries alongside full articles, improving content accessibility.

AI-Powered Customer Support System

Java, Spring Boot, REST APIs, MySQL, Authentication, Ticket System, Basic AI Chatbot

- Developed a customer support platform with Java and Spring Boot, featuring a ticketing system to log, track, and resolve customer queries end-to-end.
- Implemented secure user authentication and role-based access to separate customer, agent, and admin workflows.
- Designed REST APIs to connect the ticketing system with a basic AI chatbot, enabling automated responses to common queries and reducing first-response time.
- Structured the MySQL database to manage tickets, user accounts, and chat interaction history.

EDUCATION

B.Tech - Artificial Intelligence and Data Science

Anand Institute of Higher Technology, Anna University | 2025 | CGPA: 8.0/10
Higher Secondary (12th): 78.83% | Secondary (10th): 66.60%

ADDITIONAL INFORMATION

- Languages: English, Tamil | Experience Level: Fresher — actively seeking entry-level Java Full Stack / Backend Developer roles
